Career Summary

Java Software Engineer at Avenue Code   10/2020 - Today

Avenue Code is a software consultancy with offices all around the world. Working for Squaretrade Inc. platform as Software Engineer I've been able to:

- Monolith feature separation to microservice environment
- Maintain and upgrade core features
- Troubleshoot and support production issues

  Main technologies
  Java 8, Gradle, PostgreSQL, ActiveMQ, Docker, Jenkins, Splunk, Dynatrace, Vault.

Software Developer at LogAp Sistemas   12/2019 - 10/2020

LogAp is a software company that works with consultancy and software factory delivering end-to-end solutions to local and national companies. As a software developer I have been able to:

- Analyze and propose solutions to client's services: Legal, financial, data.
- Gather requirements and design new services
- Implement and maintain modern/legacy features.
- Support and implement Angular SPAs
- Setup harbor repository and rancher Kubernetes

  Main technologies
  Java 5-8, Hibernate, Junit4, Mockito, JSP, JSF, Struts2, Maven, Oracle 11g, Spring Boot 2, Angular 2, jQuery, JasperReports

Intern Software Developer at LogAp Sistemas   06/2019 - 11/2019

As an intern software developer, I worked at the development of a platform to manage and monitor wind farms called Windbox. As an intern I was able to:

- Implement and support microservices with different paradigms

Main technologies
Scala, Kotlin, Angular, RabbitMQ, Redis, PostgreSQL.

Intern Software Developer at MPRN   08/2018 - 06/2019
MPRN is a government agency responsible for leading state level investigations and complaints.
As an intern I was able to:

● Design and implement a time entry service for building employees
● Implement and support internal legal softwares

Main technologies
Java 8, MySQL, Active Directory, JSP, JasperReports, Maven, Hibernate, JPA, Jquery, Apache TomCat, Git, OWASP ZAP.
